

EDUCATION AROUND THE WORLD

There are **1.4 Billion** students on Earth.

Only **65.2 Million** educators Globally.

THE CHALLENGE: Too many children remain out of school, and those who are in school aren't learning the skills they need for life and work.

Children leaving school before completing their Primary Education

In the Sub-Saharan, 11.07 million children leave school before completing their primary education. In South and West Asia, that number reaches 13.54 million.

Children out of primary school

61 Million children are still out of primary school.

32 Million of these children are Girls.

1 in 5

15 to 24 years old has not completed primary school and lacks skills for work.

An estimated **250** million children are not able to read or write.

The poorest and most marginalized are the most affected.

In some emerging economies, **3 in 10** youths cannot do basic arithmetic.

Fragile and conflict-affected countries account for more than

30%

of all children not completing primary school

In some developing countries, one quarter to one-half of youth who have graduated from primary school cannot read a single sentence.
